

Accreditation and the Process Forward

Transition Planning Document

Overview

From the inception of the partnership, both the El Camino Community College District (ECCCD) and the Compton Community College District (CCCD) have been fully committed to obtaining independent accreditation for El Camino College Compton Educational Center. On June 7, 2017, the Accrediting Commission for Community and Junior Colleges (ACCJC) announced that ECC Compton Center had [achieved initial accreditation](#). Then on July 17, 2017, the Board of Governors for the California Community Colleges approved [Resolution No. 2017-2](#) recognizing Compton College as the 114th California Community College.

When the partnership began, a primary objective was to provide quality educational programs and services for student success. By initiating new student programs and expanding current offerings, student success has become a focus throughout Compton College. Academic programs initiated or expanded during the last 13 years include: Supplemental Instruction, First Year Experience, student-led tutoring, a nursing simulation lab, honors transfer classes, guaranteed transfer partnerships, Upward Bound Math & Science, Formerly Incarcerated Students in Transition program (FIST), a debate team, the Alpha Gamma Sigma Honor and Scholarship Society, and the Historically Black Colleges and Universities transfer program. In fall 2019, we will fully implement Guided Pathway Divisions to support student success.

Additionally, student success is evident through the increase of Compton College students earning degrees. The annual Academic Awards Tea recognizes the college's best and brightest, including honors transfer students, Presidential Scholars and scholarship recipients. Through financial aid assistance and an ongoing awareness campaign, El Camino College, via Compton College, continues to provide financial support for students. Scholarships to students totaling more than \$31,600 were awarded to 41 students in 2018.

Compton College has initiated a variety of new academic offerings, in addition to enhancing existing Career and Technical Education programs, including cosmetology, robotics, aerospace fastener manufacturing, career advancement, fire academy, and heating, ventilation and air conditioning (HVAC). Compton College is also participating in the Strong Workforce Program – a \$200 million program designed to boost CTE programs on community college campuses throughout California.

In 2018, Compton College increased the number of dual enrollment courses offered at local high school districts through its Afternoon College Courses, Early College Courses at the Compton Early College High School, and with AB 288 College Courses offered at Compton Unified School District high schools.

To make college education more accessible and affordable, Compton College signed “College Promise” agreements to provide guaranteed admissions and one year of paid enrollment fees to Compton College for local high school graduates. The first Compton College Promise partnership agreement was signed in Oct. 2017 with the Compton Unified School District. CUSD Class of 2018 graduates who enrolled at Compton College for fall 2018 were the first students to participate in the Compton College Promise program. The second agreement with the Lynwood Unified School District was signed in May 2018 for LUSD graduates who enroll at Compton College in fall 2019. Compton College is also developing its third College Promise partnership with Paramount Unified School District.

Work continues on the 2002 Measure CC and state capital outlay-funded facilities projects, with many campus improvements including a new central plant, upgraded main north/south road and parking lots, a renovated football stadium, campus theater, weight room renovation, new Library-Student Success Center, student health center, new Allied Health Building, and new cosmetology facility. Current projects either in the planning stages or under construction include: a new public safety facility, a student services/administration building, two all-new, multi-story instructional buildings, and renovations to the Vocational Technology and MIS/Math Buildings. In 2014, voters approved Measure C, an additional \$100 million dollar facilities bond for Compton College.
