For the purposes of this report, unduplicated headcount is defined as the total number of students (credit and non-credit) enrolled at the end of the general enrollment period (also referred to as first census date). The academic year should include leading summer, fall, winter, and spring terms. 7. Additional Instructions and Data Definitions:

Per federal regulations, ACCJC is responsible for monitoring for significant program growth (or decline) that may potentially impact an institution's ability to meet Accreditation Standards. Distance Education and Correspondence Education

#	Question	Answer
8.	Do you offer Distance Education?	Yes
8a.	Total unduplicated headcount enrollment in distance education in last three years:	2018-19 4,221 2019-20 2,824 2020-21 5,184
8b.	Percent Change 2018-19 to 2019-20: (calculated) Percent Change 2019-20 to 2020-21: (calculated)	-33% 84%
8c.	If your institution experienced more than a one-year increase (or decrease) of 50%, please explain: COVID-19 produced a large increase in the unduplicated headcount of students enrolled in distance education classes.	

8. Additional Instructions and Data Definitions:

Distance education is defined as education that uses technology to deliver instruction to students who are separated from the instructor(s) and to support regular and substantive interaction between the students and the instructor, either synchronously or asynchronously. For the purposes of this report, include only those courses that are 100% online in your calculation of unduplicated headcount enrollment for distance education. Do not include hybrid courses or courses in which all the class hours are face to face, but some material is posted online.

8a. IMPORTANT NOTE REGARDING DATA FROM SPRING 2020: When calculating total DE enrollment for 2019-20, please include 100% online courses from summer 2019, fall 2019, and winter 2020. For Spring 2020, please include only courses that were originally scheduled as 100% online. Omit any courses that shifted to a distance modality due solely to the COVID-19 pandemic.

9.	Do you offer Correspondence Education?	No
----	--	-----------

9. Additional Instructions and Data Definitions:

Correspondence education is defined as education in which (1) the institution provides instructional materials (and examinations on these materials), by mail or electronic transmission (including transmission via learning management system) to students who are separated from the instructor; and where (2) interaction between the instructor(s) and the student is limited, is not regular and substantive, and is primarily initiated by the student. Online courses or online portions of courses which primarily involve paperwork (e.g., reading textbook and other materials posted by the instructor, taking examinations, and submitting assignments) will fall within the definition of correspondence education rather than distance education. If the online portion of a class meets the definition of correspondence education, then even if the class also meets on site, it will be considered a correspondence education course for Title IV qualification purposes. Correspondence education is not considered distance education within the U.S. Department of Education definition (see question 8, above).

(This means that the denominator for the 2020-21 job placement rate will be the number of students who completed the program in 2019-20.) Report only those programs with a minimum of 10 students in the completion year. For example, if a program had 9 students complete in 2019-20, you do not need to report a job placement rate for 2020-21. Report only those programs for which reliable data are available. If your institution has defined its job placement rate differently than what is described above, you may complete this question using your local definition provided that you describe this definition in Question 20.

Other Information

20. Please use this text box to provide any comments regarding the data submitted in this report (optional, no limit).

The Distance Education unduplicated headcount differed from last year because we more accurately calculated the distance education headcount, excluding hybrid classes per the instructions.

All the data points were impacted by COVID-19 and dramatic declines in enrollment. Compton College is actively working to increase enrollment across all college programs of study. Further, career and technical education (CTE) programs of study and certificates were especially negatively impacted by COVID, due to the transition to distance education. The college is working to bring back CTE classes as quickly and safely as possible to support program enrollment.

The college has calculated new standards for certificates and transfers in 2021-2022, as declines have been observed over time. The college because these declines are due to both the transfer of programs of study with the separation, as well as declines due to COVID-19. While the college has updated the standards, staff will continue to monitor these counts very closely over the next year to determine additional action necessary to accurately capture Compton College outcomes and improve these outcomes.
